

LOGITRANS Drum turner makes it much easier to handle laying and standing drums.

The drum turner, an accessory, that can easily and quickly be mounted on all LOGITRANS Logilifts and Stackers models fitted with adjustable forks.

The LOGITRANS drum turner is designed for handling standard steel drums but is also available with an extra support attachment, especially designed for plastic drums.

The photographs shows the drum turner mounted on a stacker with straddle chassis, specification giving extra stability and safety when lifting and transporting drums.

The drum attachment is easy to replace with one of the many fork options LOGITRANS equipment offers. **This means the LOGITRANS Logilifts and Stackers can still be used for lifting pallets, boxes, etc.**

Capacity 350 kgs
Turning radius 360°
