

PANTHER SILENT

Why
LOGITRANS?

logitrans.com

Special rubber wheels
(both steering and
fork wheels)

Nylon caps between
metal components
and tight tolerances

Adjustable fork height

Ergonomically
correct handle

Less sickness days

The ergonomic design and its noise level below 60 dBA reduce sickness days and give happier employees.

Higher efficiency and performance

The unique design of the Panther pallet truck will increase the efficiency and lower cost per lift (tests with 46.000 lifts).

Also, it is excellent for outdoor transporting on gravel and snow.

The wheels are gentle to floor and flagstone layers (non-marking).

Durability, lifetime

The strong construction with use of quality materials and its round design provide a long operating life and lower maintenance costs.

All pallet trucks will be tested before shipment.

Flexibility

- Different fork lengths and widths.
- Tailor-made solutions.
