

# A World of Rotators...

## A World of Rotators...

**Do you need to tilt or rotate boxes, reels or anything else?  
The Rotator is the perfect solution!**

### Three good options...

Tilt crates or boxes, and reach the contents without stretching and straining your back – with a **Rotator with forks**. You can also turn boxes and crates upside down.

Fix and rotate different items, e.g. tools, with a **Rotator with multi-purpose carriage**. The model can be adapted to your specific requirements.

Transport, lift and rotate reels with a **Rotator Reel Clamp**.

**Do you require ergonomically correct work positions?**

**Choose a Rotator from Logitrans!**

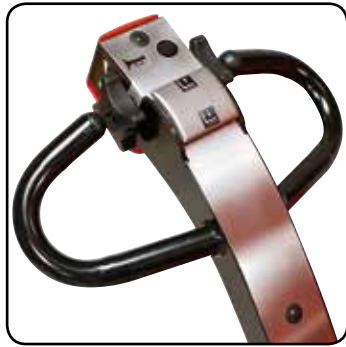

- Least possible distance to the objects and easy access to the items at the bottom of the box
- Reels can be transported, lifted and rotated
- Minimum strain of back, shoulders and joints
- Avoid bending sideways when lifting
- Electric lifting, rotation and propulsion, if requested

***Call us and let us find the best ergonomic solution!***

**Rotator Reel Clamp**
