

OEC Hand Pallet Truck

2300kg

The perfect basis for all transport systems

The OEC2300 hand pallet truck is the perfect basis for all transport systems involving palletised goods and materials. Versatile, convenient and reliable, it performs well in any environment. With its high quality and reliability, the OEC2300 offers many years of problem free pallet handling. Excellent ergonomic properties guarantee safe, user friendly handling.

Hand Pallet Truck - OEC2300

Key benefits:

- Easy to steer and manoeuvre because of 180° steering angle
- Easy to pump because of high quality and design
- Easy pallet entry thanks to rounded fork tips and front climber wheels
- Easy to handle because of low weight
- Reliable and robust fork frame made of high strength steel

Additional options:

- Quicklift option reduces number of strokes required to lift pallets for improved productivity
- Handbrake option is also available

Truck information:

Capacity	2300kg
Pump strokes to full height	12
Truck weight	65kg
Minimum fork height	85mm
Maximum fork height	200mm

Available fork dimensions:

450 x 910mm	520 x 1000mm
520 x 1150mm	520 x 1220mm
685 x 1000mm	685 x 1150mm
685 x 1220mm	

Available wheel choices:

Nylon

- Suitable for use on hard, smooth floors
- Robust and durable
- Best choice when the load is heavy
- Non-marking

Polyurethane

- Nylon wheel core with polyurethane tread
- Preferred when a low noise level is required
- Suitable for loads up to 1200kg
- Suits all kinds of application

Rubber

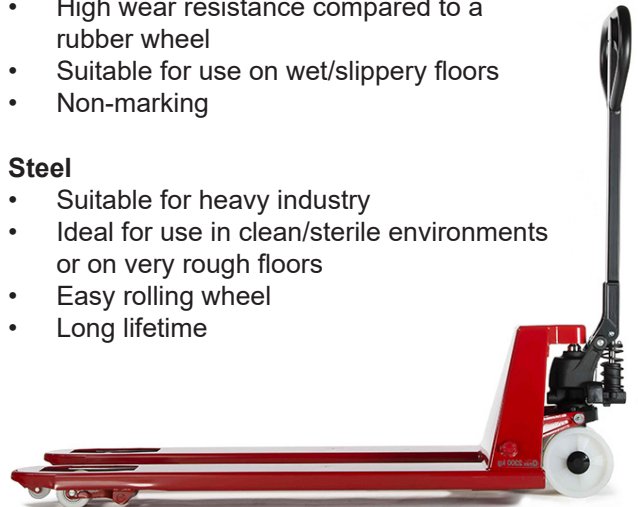

- Very quiet
- Provides good grip on wet/slippery floors
- Not as suitable for uneven/rough floors
- Not suitable for heavy loads

Powerthane

- Produces low noise levels
- High levels of durability
- High wear resistance compared to a rubber wheel
- Suitable for use on wet/slippery floors
- Non-marking

Steel

- Suitable for heavy industry
- Ideal for use in clean/sterile environments or on very rough floors
- Easy rolling wheel
- Long lifetime
