

PANTHER INOX

Why LOGITRANS?

logitrans.com

Closed forks
(at fork wheels)

AISI 316L acid-resistant
steel for chassis (no rust
in case of scratches)

Many options for
lubricating

Ergonomically
correct handle

Hoop skates – only
one in each side

Short overall measurements
= small space requirements

Permanent quick lift: Only two
pump strokes and the pallet
truck is ready to operate

Hygiene

The closed structure in AISI 316L acid-resistant steel for chassis decreases the risk of bacterial attacks.

Also, no rust on scratches.

Developed in cooperation with a creamery – severe hygiene demands where it is exposed to an aggressive environment and thorough cleaning.

Ergonomics

The ergonomic design reduces sickness days and gives happier employees.

Durability, lifetime

The strong construction with use of quality materials provides a long operating life and lowers maintenance costs.

All pallet trucks will be tested before shipment.

Flexibility

- Available in Inox and Inox Plus versions.
- Key sketches available for Inox and Inox Plus.
- Available in antistatic version EX.
- Tailor-made solutions.
