

# PANTHER

Why  
LOGITRANS?

[logitrans.com](http://logitrans.com)

Ergonomically correct handle

Adjustable fork height

Strong construction (no through-going axle in the A-frame)

Movable parts with tight tolerances without metallic contact

## Less sickness days

The ergonomic design reduces sickness days and gives happier employees.

## Higher efficiency and performance

The unique design of the Panther pallet truck will increase the efficiency and lower cost per lift (tests with 46.000 lifts).

## Durability, lifetime

The strong construction with use of quality materials and its round design provide a long operating life and lower maintenance costs. All pallet trucks will be tested before shipment.

## Flexibility

- Different fork lengths and widths.
- Different wheel types.
- Available in Inox and Inox Plus versions.
- Tailor-made solutions.

Less strokes to raise to full height (permanent quick lift pump)

Fixed/movable (articulating) steer wheel axle

Rounded corners meaning less damage to surroundings
